

A Better Way To Mirror And Stream

This ultra-fast screen mirroring and media streaming software for Mac and Windows brings performance unrivaled by AirPlay and Google Cast alternatives. AirParrot boasts over one million users worldwide. Discover why.

Share to the big screen

Enjoy a seamless sharing experience to popular media receivers. No cables, adapters or compatibility concerns.

- Apple TV
- Chromecast
- Select AirPlay 2-enabled devices
- Select Chromecast built-in devices

Top-of-the-line performance

AirParrot 3 efficiently processes video at lightning-quick speeds, allowing it to excel while streaming video content and offer imperceptible mirroring latency.

Hassle-free connections

Our patent-pending Quick Connect® technology and Bluetooth discovery make connecting over diverse and complicated networks a breeze.

Extend desktop to boost screen space

Maximize your workspace by using a TV or other large display as a wireless extra monitor.

Specific-app mirroring

Mirror a specific application instead of your entire computer screen.

Multi-destination mirroring

Share content to a number of screens at the same time.

Audio-only mode

Stream lossless audio without video to devices.
