

Enterprise Plan

Miro is the enterprise-ready, collaborative whiteboard platform that transforms the way high-performing distributed teams get work done

Key Features

- **Advanced security and controls** like SSO, SCIM, domain control, domain whitelisting, detailed audit logs, and more.
- **Advanced user administration and management** with visibility into user activity and licensing for occasional users.
- **Dedicated customer success** to provide custom onboarding training programs, business reviews, and more for rollout and adoption.
- **Unlimited multi-team workspaces** allows teams to collaborate with ease while maintaining privacy where it matters.
- **Control sharing permissions** via link access controls or domain whitelisting to limit the ability to share content outside of your company.
- **Company-approved shareable templates** to help scale processes and promote consistency across the company.
- **Vendor review resources** for security and MSA support.

 **Instapage**

Miro helped us get the most out of our deep research process and cross-functional collaboration with the design and development teams.

Once we could piece together and visualize what our distributed team learned, we were able to ship product solutions 20% faster.

Kevin Yang,
Product Manager

Backed by leading global VC **Accel**

Get the whole company on board, literally

Miro's infinite whiteboard canvas allows distributed teams to work as if they were in the same room with a robust suite of collaboration features.

- Digital sticky notes with tagging
- Multi-player live cursor tracking
- Threaded commenting with @mentions
- Library of pre-built templates
- Core integrations, plus Azure DevOps, CA Rally, Okta, Azure AD
- Advanced search across multiple teams & board content (coming soon!)

Rollout a proven solution across your company

A dedicated customer success manager will partner with you to ensure Miro delivers immediate value to your company.

- Customized admin and end user training sessions
- Education on distributed collaboration best practices gleaned from other Enterprise customers

Customers name Miro a Collaborative Whiteboard Leader on G2

miro
